**Access Planning Capabilities**

# Access planning for the UK's railways

With almost 100 years of combined rail experience – and with a thorough understanding of NR/L2/OHS/019 – our in-house planning team provides a fully compliant and professional service that's fully in line with both Network Rail and RISQS requirements.

Working across a variety of safety critical competencies, this combination of knowledge and experience – practically unique in our field – allows us to plan and execute all planning works internally, tailoring our offering to suit the unique requirements of each client, site or project.

## We cover:

### Line Blockages

### Possessions

### Isolations

### Safety Critical Paperwork

Arranging short term access using RailHub

Producing Safe Work Packs (SWP) and site-specific Task Briefings (TBS)

Work Package Planning to comply with NR/L2/OHS/0044

Providing key Sentinel-approved Person in Charge (PIC) and Responsible Managers (RM)

AC & DC isolation planning including site walk outs where required

Planning, inputting, and managing applications via the Network Rail Possession Planning System (PPS)

Producing site and project-specific Risks and Method Statements (RAMS)

Attending all long and short-term Network Rail planning meetings

Planning, inputting, and managing applications via the Network Rail Possession Planning System (PPS)
